## on the Three-Block Model of Universal Design for Learning

Presented by **Dr. Jennifer Katz**

August 8 to 12, 2016

Hilton Winnipeg Airport Suites

Develop your understandings and skills related to Universal Design for Learning and your ability to create environments and instructional practices that support the education of all students in inclusive settings.

Teachers and school leaders will learn strategies to:

- plan and deliver universally designed instruction and assessment;
- design classrooms that accommodate diverse learners;
- grow students' self-esteem and social responsibility; and
- achieve improved social and academic outcomes for all learners.

Dr. Katz's Three-Block Model is a practical and complete system for implementation of UDL. It offers a step-by-step approach to educational planning, instruction and assessment in inclusive classrooms. It integrates multiple effective strategies (differentiated instruction, understanding by design, inquiry, etc.) into a unified, straightforward approach. It makes inclusive education an achievable reality for the typical teacher. Sample units, lessons, rubrics, video and student work are included.

The SI is focused on beginners with no background or previous experience, or educators who have had only a one- or two-day introduction to the model. It is also potentially beneficial for those who are already working with the model and want a refresher or an immersion experience.
